

# The Advanced Chest X-Ray Study Day

Venue : Education Centre, Northwick Park Hospital, London. HA1 3UJ

## PROGRAMME

- **Material:** *Approximately 100 plain CXRs for you to analyse.*
  - **Objectives:** *registrants to test and reinforce – anonymously – their observational skills and interpretation/deductive reasoning.*
- 9.00 Welcome and introduction
- 9.30 **Set # 01** – *Mixed cases. GP and A&E referrals*
- 10.00 Answers **Pause ... for your questions**
- 10.50 **Set # 06.** *Each of these CXRs shows widespread (diffuse) lung shadowing. What is the most likely cause? The format in this session:*  
(a) A short introduction – *ie our approach for a step-by-step assessment whenever diffuse lung shadowing is detected.*  
(b) You analyse these cases. Apply a “descriptive grouping” to the shadowing in each case; then suggest **the most likely** diagnosis – or, at most, the **2 or 3 most likely** diagnoses - in each case.
- 11.20 **COFFEE**
- 11.35 Answers. The Set 06 cases. **Pause ... for your questions**
- 12.15 **Set # 04** – *Mixed cases. Some are in-patient CXRs.*
- 12.40 Answers **Pause ... for your questions**
- 1.10 **LUNCH**
- 1.40 **Set # 07** – *Mixed cases. Out-patients and A&E.*
- 2.10 Answers **Pause ... for your questions**
- 2.45 **Set # 05** – (a) *Mainly frontal CXRs;* (b) *For several patients you will see the lateral CXR only. In each case – by applying the basic principles & the well established analytical rules - deduce and describe what the corresponding frontal CXR will show?*
- 3.10 Answers **Pause ... for your questions**
- 3.50 **TEA**
- 4.10 **Set # 02** – *“What’s this? Is it pathology or normal anatomy?? “*
- 4.40 Answers **Pause ... for your questions**
- 5.30 **FINISH** **Course organised by: [www.radiology-courses.com](http://www.radiology-courses.com)**
